

Welcome to week four of our IIF
2Q proactive event.

**Who field verifies isolation/
blind lists prior to releasing to
Maintenance? Why?**

***What we heard during our Celebration Lunch
Some shared thoughts from the line.***

- 1. Proactive event discussions are an important way we build our Hazard ID and Risk Recognition abilities. Also, relationships between workers are the foundation for good dialog during safety meetings and during field execution.*
- 2. Stop/ Pause Work Authority is a topic that we should focus more on; a) "How To", b) communication of expectations, c) and how off the job examples relate to work.*
- 3. Our Contract Partners say Richmond is a great place to work because of our proactive safety activities/ and approach to work. But, we can still improve Tailgate and start of shift meetings.*
